

Oncology expertise and support for health plan members with cancer

20% to 25% of all health expenditure is currently wasted on ineffective or inefficient practices¹

Without proper support for optimal care throughout the cancer journey, your health plan members may face unnecessary treatments and costs, and poorer outcomes. Offering AccessHope's cancer support services can help lower healthcare costs over time while enhancing the care experience for everyone.

AccessHope connects members who have been diagnosed with cancer and their community oncologists to the renowned cancer expertise of National Cancer Institute (NCI)–Designated Comprehensive Cancer Centers. Through our suite of services, these local doctors can gain insights they may use to get their patients on the right course of treatment early on for the best outcomes possible.

AccessHope's suite of cancer support services includes:

Member-initiated services

Cancer Support Team and Expert Advisory Review work together to support your members whether they've just been diagnosed, have already started treatment, or have previously been diagnosed with cancer.

Cancer Support Team

Your employees can connect with qualified personnel including experienced oncology nurses to discuss tips on preparing for doctor appointments, treatment information, or emotional concerns—wherever they are in their cancer journey.

This service can help employees:

- Understand their specific type of cancer
- Understand the types of treatments typically provided for their type of cancer
- Prepare for their first appointment with an oncologist
- Learn more about the availability and importance of clinical trials
- Access informational resources on cancer screening, prevention, and treatment

Expert Advisory Review*

Members can request that an AccessHope medical expert reviews their case. This specialist may provide recommendations for their treatment plan based on groundbreaking insights and leading discoveries in their specific cancer to their community oncologist, so they can stay close to home.

Physician-support services

Accountable Precision Oncology

When a member receives a complex-cancer diagnosis, our algorithms—in collaboration with your organization or a third-party administrator—trigger the case to be securely sent to AccessHope. We then assign a cancer subspecialist to the case. Specializing in that particular cancer, the specialist leverages leading cancer expertise to suggest recommendations associated with improved clinical outcomes, including the latest research findings and any suggested medications, tests, or clinical trials. The member's community doctor continues to create and modify the treatment plan.

Curbside Consult

Community oncologists treating your members can securely submit questions online on topics such as workups, treatments, clinical trials, or referrals. AccessHope's subspecialists will review the questions and respond virtually the next business day or by phone with an appointment.

Molecular Marker Profile Interpretation

Community oncologists can also take advantage of the insights that AccessHope's subspecialists with deep expertise in molecular testing can offer. They'll evaluate and interpret the member's next-generation sequencing (NGS) testing results and give the community doctor treatment recommendations within two business days.
