

Unmatched expertise in the fight against cancer

At AccessHope, we're bringing the latest cancer expertise straight to the doctors and their patients who need it most—no matter where they are. Our remote expert case reviews are making a real difference, leading to better outcomes for members and real impact for our clients.

Cancer is the leading driver of employer healthcare costs¹

84% of people don't seek a second opinion on their cancer diagnosis²

35% of cancer patients had changes in treatment plans from an expert review³

58% of cases where second opinions differed from first opinions had a potential major impact on patient outcomes⁴

How AccessHope's unique solution works

An unmatched network of 7 NCI-CCC partners and over 330 oncologists.

NCI-CCC subspecialists review individual cancer cases and remotely collaborate with the member's treating oncologist.

Member is not required to do anything and never has to leave home.

Oncologist receives a comprehensive case review from an NCI-CCC subspecialist in that particular cancer.

Our expert review process explained

There are two ways cancer cases are identified

1

AccessHope proactively reviews claims to flag cases for expert review.

2

Employees request a review themselves, giving them peace of mind and full visibility into their premier cancer benefit.

Cancer case identification

By assessing claim data

Medical record acquisition

Multidisciplinary team case review

AccessHope foundational partner reviews case

Case report with recommendations and physician survey

Clinical consultation

Relevant clinical trials have been identified and recommended in 34% of case reviews. AccessHope offers an enhanced service that supports physicians and patients from trial matching through enrollment.

AccessHope is making an impact

AccessHope is making recommendations in 93% of cases

1 out of 2 recommendations to change treatment were adopted and in 2 out of 3 cases at least one recommendation to change treatment was implemented

Fighting cancer with everything we know™

Cancer care gets better every day, from constant advancements in therapies to promising clinical trials. But it's still not doing the most good for the most people. That's why AccessHope is sharing all the latest discoveries and working with local oncologists to develop precise plans for treatment. We can bring the vast expertise of major medical centers to people near and far. They never have to switch doctors. They never have to leave home.
