

Oncology expertise and support for individuals with cancer

Cancer typically accounts for 12% to 15% of a company's overall healthcare costs¹

Cancer is a leading driver of healthcare costs to employers.² Connect individuals diagnosed with cancer to the many answers they urgently need—to positively impact their health while saving healthcare costs.

AccessHope's cancer support services offer members access to the renowned cancer expertise of National Cancer Institute (NCI)–Designated Comprehensive Cancer Centers. Whether they're on the phone with an experienced nurse or in-person with their community-based doctor, members across the country access the latest cancer knowledge from our multidisciplinary specialists early on for the best-possible outcomes.

AccessHope's suite of cancer support services includes:

Accountable Precision Oncology

When a member receives a complex-cancer diagnosis, our algorithms—in collaboration with the health plan or third-party administrator—trigger the case to be securely sent to AccessHope. AccessHope then assigns a cancer subspecialist to the case. Specializing in that particular cancer, the specialist leverages leading cancer expertise to suggest recommendations associated with improved clinical outcomes, including the latest research findings and any suggested medications, tests, or clinical trials. The member's community doctor continues to create and modify the treatment plan.

Expert Advisory Review*

Members can request that an AccessHope medical expert reviews their case. This specialist may provide recommendations for their treatment plan based on groundbreaking insights and leading discoveries in their specific cancer to their community oncologist, so they can stay close to home.

Cancer Support Team

Members can connect with qualified personnel including experienced oncology nurses to discuss tips on preparing for doctor appointments, treatment information, or emotional concerns—wherever they are in their cancer journey.

This service can help members:

- Understand their specific type of cancer
- Understand the types of treatments typically provided for their type of cancer
- Prepare for their first appointment with an oncologist
- Learn more about the availability and importance of clinical trials
- Access informational resources on cancer screening, prevention, and treatment

Onsite Expert Consultation

AccessHope's Onsite Expert Consultation is an in-person second opinion service that supports members coming onsite for a comprehensive evaluation of their cancer during a visit at a NCI-Designated Comprehensive Cancer Center with a premier oncologist supported by cancer experts.

After a cancer diagnosis, individuals can call AccessHope to arrange for a highly personalized day of appointments with an oncologist or hematologist specializing in their type of cancer, and additional consultations with a surgical oncologist, radiation oncologist, supportive care provider or other specialists as needed.

* Not available in Rhode Island or outside of the United States
