

Oncology expertise and support for your clients' employees with cancer

Cancer typically accounts for 12% to 15% of a company's overall healthcare costs¹

Cancer expenses are one of the top three medical-expense categories for employers.² Connect your clients' employees diagnosed with cancer to the many answers they urgently need—to positively impact their health outcomes while saving your clients healthcare costs.

AccessHope's cancer support services offer employees access to renowned cancer expertise from National Cancer Institute–Designated Comprehensive Cancer Centers. Whether they're on the phone with an experienced nurse or in-person with their community-based doctor, employees across the country access the latest knowledge on cancer from our multidisciplinary specialists for the best outcomes possible.

AccessHope's suite of cancer support services includes:

Continuity of support through complementary services

Cancer Support Team and Expert Advisory Review work together to support your clients' employees whether they've just been diagnosed, have already started treatment, or have previously been diagnosed with cancer.

Cancer Support Team

Your clients' employees can connect with experienced oncology nurses to discuss tips on preparing for doctor appointments, treatment information, or emotional concerns—wherever they are in their cancer journey. This service can help employees:

- Understand their specific type of cancer
- Understand the types of treatments typically provided for their type of cancer
- Prepare for their first appointment with an oncologist
- Learn more about the availability and importance of clinical trials
- Access educational resources on cancer screening, prevention, and treatment

Expert Advisory Review*

Employees can request that an AccessHope medical expert reviews their case. This specialist may provide recommendations for their treatment plan based on groundbreaking insights and leading discoveries in their specific cancer to their community oncologist, so they can stay close to home.

Accountable Precision Oncology

When an employee receives a rare- or complex-cancer diagnosis, our algorithms—in collaboration with your clients' health plans or third-party administrators—trigger the case to be securely sent to AccessHope. AccessHope then assigns a cancer subspecialist to the case. Specializing in that particular type of cancer, the subspecialist leverages leading cancer expertise to suggest recommendations ranging from slight to significant changes associated with improved clinical outcomes, including the latest research findings and any suggested medications, tests, or clinical trials. Your employee's community doctor continues to create and modify the treatment plan.
