

Oncology expertise and support for employees with cancer

Cancer typically accounts for 12% to 15% of a company's overall healthcare costs¹

Cancer expenses are one of the top three medical expense categories for employers.² Connect your employees diagnosed with cancer to the many answers they urgently need—to positively impact their health outcomes while saving your company healthcare costs.

AccessHope's cancer support services connect employees to renowned cancer expertise at National Cancer Institute–Designated Comprehensive Cancer Centers. Whether they're on the phone with an experienced nurse or in-person with their local doctor, employees across the country access the latest knowledge on cancer from our multidisciplinary specialists for the best chance of a cure.

AccessHope's suite of cancer support services includes:

Continuity of support through complementary services

Cancer Support Team and Expert Advisory Review work together to support your clients' employees whether they've just been diagnosed, have already started treatment, or have previously been diagnosed with cancer.

Cancer Support Team

Your employees can connect to experienced oncology nurses for appointment details, treatment information, or even emotional support—wherever they are in their cancer journey. This service can help employees:

- Understand their specific type of cancer
- Understand the types of treatments typically provided for their type of cancer
- Prepare for their first appointment with an oncologist
- Learn more about the availability and importance of clinical trials
- Access educational resources on cancer screening, prevention, and treatment

Expert Advisory Review*

Your employees can request that an AccessHope medical expert reviews their case. This specialist will provide recommendations to their treatment plan based on groundbreaking insights and leading discoveries for their type of cancer, while communicating with their doctor so they can stay close to home.

Accountable Precision Oncology

When an employee receives a rare- or complex-cancer diagnosis, our algorithms—in collaboration with the employer's health plan or third-party administrator—trigger the case to be securely sent to AccessHope. We then contact their local treating oncologist and assign our multidisciplinary subspecialist to the case. Specializing in the type of cancer, our expert agrees or disagrees with the approach with no to significant recommendations, including the latest research findings and any suggested medications, tests, or clinical trials. Meanwhile, their doctor continues to oversee their treatment plan.

Expert Evaluation

Employees can request an in-person review of their case with a leading oncologist from AccessHope's foundational partner City of Hope. The oncologist will advise them on the most-effective tests, therapies, and treatments for their type of cancer, while their local doctor continues to oversee their care.

For your employees, this service can:

- Introduce them to a clinician who can support their local physician
- Procure their medical records and perform pathology reviews
- Arrange consultations with a medical oncologist, medical hematologist, surgical oncologist, radiation oncologist, supportive care provider, or other subspecialist, in coordination with their local oncologist
- Identify clinical trials that may be right for them and provide clinical trial information
- Assign them to a patient navigator
- Coordinate their ongoing care with a local treating physician
- Connect their case to a board of specialists
- Arrange transportation to and from their hotel or airport

* Not available in Nevada, Rhode Island, or outside of the United States
