

Renowned expertise that closes the cancer knowledge gap

Medical knowledge doubles in only

73
DAYS¹

The field of cancer is changing quickly and becoming more complex

Oncologic innovation is developing at an extraordinary pace. To keep up, community oncologists who treat many types of cancer every day can benefit from the support of cancer subspecialists who focus on the latest advancements in testing and treatments.

AccessHope's multidisciplinary specialists engage with community doctors to close the cancer knowledge gap, helping improve patient outcomes while reducing low-value patient interventions.

Our services

Our suite of services—including **Cancer Support Team** and **Expert Advisory Review, Accountable Precision Oncology, and Onsite Expert Consultation**—connects your employees to expertise that closes the cancer knowledge gap through a vital employer benefit.

76%
of U.S. oncology practices remain small, employing only 1-5 oncologists²

With AccessHope, employees and their community oncologists can:

Gain insight from subspecialists with National Cancer Institute–Designated Comprehensive Cancer Centers who know of the most-current personalized treatments, such as clinical trials or breakthrough medications, and genetic/genomic testing and targeted therapies.

Receive proactive, timely, and seamless access to the expertise of multidisciplinary specialists for optimal care.

Stay close to home with their local support system of family and friends while their physician continues to determine their treatment plan.

Benefit from direct communication between leading academic oncologists and treating physicians through a physician-to-physician clinical consultation call.

Get on the right course of treatment early on, for the best outcomes possible.

Access qualified personnel including experienced oncology nurses for appointment details, treatment information, or emotional support—wherever they are in their cancer journey.
